U. S. Department of Agriculture

*ABORA. Rich red-violet self; heavy texture of great smoothness; horizontal falls. H.M., A.I.S.
ACROPOLIS. A wonder in California, but here alas; slow. Large, rich deep purple bicolor; tall.
ADOBE. Hotchal getting into Mexico. S. buff and F. of pompeian red, shading to yellow; floriferous.
AHWAHNEE. Large tawny blend with a long blooming period. S. mottled lavender, F. veined carmine.
*ALCINA. Very crisp and clear toned, S. yellow, F. bluish; you will like it.
AMRITA. Soft blue much like Ballerine in coloring but differing in shape. 42"
BERGAMA. Large bronzy purple and gold variegata.
*BLUE HILL. Fine, unusual blue shade, white beard and throat; silky texture. H.M., A.I.S. '32.
BLUE TORCH. Lights its way with an orange beard; S. lavender and purple, F. reddish.
BLUE WAVES. Smooth rich dark blue; horizontal F.
BOADICEA. Charming blend of soft yellow, delicate pink, and blue flush; strong, slender.
*CARRARA. Graceful pure white; it is becoming better known each year.
CHERRY RUST. It's unusual, more coppery than King Tut; low rosy-orange and mahogany mass.
CORONA. Smooth satiny bicolor yellow; S. rich yellow, F. white; very floriferous.
*ENCHANTMENT. S. are lilac with fawn, F. reddish.
ERIN. Lovely tall vigorous and charming bicolor; S. light lavender, F. petunia-violet. 42"
*FASCINATION. Very tall, clear, bright purplish-pink, much like Aphrodite.
FRAGONARD. Remember old Queen of May? This is a slightly deeper pinkish-lavender.
*GOLDILOCKS. "Locks" of gold and lots of it; uniform soft yellow, smooth texture; very early, strong.
GOLD TOP. Yes, a variegata; S. rich old gold, F. red-violet edged gold, early. 42"
GRACE STURTEVANT. None better; carry? Oh my! deepest dark red-brown and violet-carmine; dry.
HASSAN. Here is a bright orange beard on an iris which is bright yellow with olive-flushed F.
HELEN CAMPBELL. Almost a deep red-purple self.
*HENRI RIVIERE. A most beautiful blend of pure lemon yellow and lilac mauve; large, late, 42".
*INDIAN CHIEF. He ranks above all others; striking large clear bright red bicolor; F. deep-red
IRMA POLLOCK. Brilliant garden effect; S. magenta, F. velvety carmine with lighter edge.
JACQUARD. Dark red-purple; a red glow permeates the bloom giving it great carrying power.
*KING MIDAS. Giving a king; golden buff and brown, lots of gold at center, velvety falls.

KING TUT. Still a striking color, a bright dark red; a great favorite.
LILLIAN TOEDT. The S. lighter than the F. make this low growing pink blend very charming.
MABEL TAFT. Particularly outstanding violet-blue.
MARESCHAL NEY. Very rich bicolored red, with a chestnut-brown tone. H.M., A.I.S. '32.
MIDWEST PRIDE. A red-purple that stands out; F. velvety, lighter at edges; heavy substance.
MODOC. Almost black; color, velvety texture and great vigor make it most desirable.
MY MARYLAND. Bronzy violet and crimson. H.M., A.I.S.
*NEPENTHE. Different; charming rosy-yellow blend, with long falls. H.M., A.I.S. '32.
NOCTURNE. Extremely rich dark blue and velvety.
PINK JEWEL. A sure favorite; a "warmer" pink than others; heavy substance; rapid increase.
*PLUIE D'OR. Largest and best pure golden yellow self; very floriferous; most popular.
PRAIRIE KING. Tall, intense deep blue.
PURISSIMA. Here it is, perfection in a pure white but beware it wants a dry location; very tall; large flowers of good substance.
PURPLE EVE. A large flower of raisin purple and manganese violet.
PURPLE NIGHT. A tall dark blue-purple self, very rich and deep.
*RED WING. Light brown and dahlia carmine; large.
RHODES. A magnificent red-purple, almost crimson.
ROSE OF CUBA. A rose-toned flower of good size.
SACRAMENTO. Fine tall giant plicata, white ground heavily edged red-purple. H.M., A.I.S. '31.
SANDALPHON. Unusually rich tones of violet, with heavy velvety falls.
SANTE FE. Early porcelain self, paling to white; perfect form, flaring falls. H.M., A.I.S. '32.
SENSATION. It has been and still is. Very tall, exquisite cornflower blue, fragrant.
SIR MICHAEL. Clear lavender-blue, rich purple.
SNOWDRIFT. Very fine sweet-scented white of medium height, heavy substance and good form.
SOLITAIRE. Graceful clear white, good substance.
THURATUS. An early dark purple self.
TOKAY. Lovely pale yellow-pink of salmon tone.
VIRGIN GOLD. Excellent low growing yellow of nice clear tone; very floriferous.
WACONDA. Clear and bright fuchsia red. H.M., A.I.S.
YELLOW PEARL. Round big luminous pale primrose yellow with a pearly sheen; heavy texture.

* Highly recommended for New England

JOIN the AMERICAN IRIS SOCIETY

\$3.00 a year

Four bulletins each year, with iris notes, names of new varieties, etc. Checks should be made payable to the American Iris Society and sent to B. Y. Morrison, 116 Chestnut St., Takoma Park, D.C.

Table Irises

How many of us have endeavored to create a picture for the table out of irises? And have we given up in despair! The tall rigid stems that we demand in our garden irises most certainly do not lend themselves to the grace needed for the dining table. In England Miss Pesel offers a prize each year for irises of less than 24" in height. These low-growing irises are there called "Pesels". Two years' ago, our Miss Williamson coined the name "Table irises", which is now in general use in America. The requirements for this class are small dainty flowers, gracefully poised on slender wiry stems; the foliage must be in proportion. These Table irises bloom with the tall bearded.

BLUE MOUSE (Rich.'34)	A dainty little light grey-blue, late.	that blooms \$0.35
KINGLET (Wmsn.'34)	Deep golden yellow, with very attractively shaped blooms. 29".	\$0.50
LITTLE BOUQUET (Sturt.-Kell.'36)	See New Introductions, first section, page	\$10.00
MONARDA (Rich.'33)	A rich dark red, that blooms late. 24".	\$0.35
TID-BIT (Sturt.'25)	A few of the older irises may well be included in this class. This one is lavender. 10".	\$0.35
TOM-TIT (Bliss '19)	A gay little mulberry-purple iris. 18".	\$0.35
WARBLER (Wmsn.'35)	Who doesn't love a yellow warbler? You will like this bright little Warbler, too. A clean light yellow, vigorous and prolific. 25".	\$0.50
YELLOW ELF (Sturt.-Kell.'36)	See New Introductions, first section, page	\$10.00
YELLOW TOM-TIT (Sturt.'30)	Lemon yellow in color, well proportioned, and fine in form and substance. Clover-scented. 14".	\$0.35

Early Dwarf Irises

The early dwarf iris fill a very special corner in the gardener's heart - they bloom so early, so gaily, so fragrantly! Cherish a few of the named varieties; plant masses of the unnamed seedlings for a colorful carpet, running up the side of the rock garden, or in front of the border. For best results, divide every two years, soon after blooming, using a little well-rotted manure or commercial fertilizer. The latter may also be applied to advantage in early spring.

ALBATRE	Creamy white, the F. tinged with color. Narrow petals. 8".	\$0.25
ALPIN.	S. nice blue; F. purple, blue edged. 5".	\$0.35
ARAMIS.	S. fine yellow, ruffled; F. deep olive. 6".	\$0.35
BABY MINE.	Lemon-yellow, almost a self. Small bloom. 4".	\$0.25
BALROUDOUR (Sass '33)	Hybrid. S. light violet blue, with a little purple on the midrib; F. deep olive buff with a heavy red-purple sector thro' center. Different and very interesting. Two blooms to a stalk. 12".	\$0.25
BLACK MIDGET (McK.'23)	A very dark black-purple self, with thin petals. Usually blooms again in the fall. 6".	\$0.35
BLUE MINIATURE (Loom.-Kell.'34)	A blue-purple self with white beard and throat venations. Three very large blooms on a well branched stem. 12"	\$0.35
BLUE TOPAZ (Sass '35)	Hybrid. A very charming combination of blue, brown and green. 12".	\$0.25
BOUQUET (Mil.'02)	White, with cream and pale lilac. 6".	\$0.35
BRIDE (Cap.'01)	White. 6".	\$0.25
BRIGHTNESS (Emig.'35)	Bright yellow; a fine color, with no venations; the S. are slightly lighter than the F. Beard is gold. 10".	\$0.75
BUZZER (H.V.)	This and Reflection, are the best of the medium blue dwarfs. Buzzer is a bit the darker, with more purple washed on the F. 9".	\$0.50
CANDIDA.	Creamy white, with inhanging F. 6".	\$0.50
CHAMEIRIS AUREA MACULATA.	Yellow, the F. just tinged with a darker shade. Good form. 6".	\$0.35
CYANEA.	A good dark violet purple. 6".	\$0.25
DITTON'S PURPLE.	A fine deep violet self, with matching beard. 6".	\$0.25
ENDYMION.	Ruby-red, so dark as to be almost black. 8".	\$0.25
FALLEN LEAF (Gers.-Kell.'34)	One of the hybrid dwarfs, of rich dark brown. Very different. 10".	\$2.00
GLEE (McK.'23)	Pale yellow with a deeper beard. 6".	\$0.50

GOLD FINCH. A bright yellow self. 6".	\$0.50	PRINCESS LOUISE (Per.'03) A very charming sky-blue. 6".	\$0.35
GRAY CLOUD (Sass '35) Hybrid. An interesting and very distinct combination of blue, grey, red, green and brown. Two blooms. 12".	\$1.00	PUCK (Sass) Dark garnet with velvety F. Deep gold beard. 6".	\$0.35
HARBOR LIGHTS (H.V.'27) Well formed flowers of light yellow. 8".	\$0.50	PURITY (Cap.'01) A creamy-throated white. 8".	\$0.50
HAYDN (Cap.'02) Porcelain white and grey. 8".	\$0.25	REFLECTION (H.V.'23) The color is a lovely medium blue, but the form is not too good. 6".	\$0.50
HONEY BOY (Keller '31) S. creamy pale yellow, sometimes flecked with purple: F. deeper yellow, marked with purple. Turquoise midrib. 8".	\$0.75	ROSE MIST (Sass '31) The S. are a misty rosy mauve; F. reddish purple. 8".	\$0.25
JUDY (H.V.'27) Dark ruby red, of fine form. 9".	\$0.75	SAPPHIRE NIGHT (Nich.'34) A deep lustrous indigo-blue self, with a very dark beard. F. are slightly velvety. Low branched, with three buds to the stalk. 10".	
LADDIE BOY (Sass '31) A nice dark blue, with velvety F. Light beard. 9".	\$0.35	SILVER ELF (H.V.'28) S. are pure white; F. are silvery grey, very delicately veined with light blue. Growth is slow. 8".	\$0.75
LA FIANCEE (Vilm.'20) S. bluish white; F. lighter. Pale yellow beard. 5".	\$0.50	SOUND MONEY. see p.	\$0.50
LOBELIA (Mil.'07) Medium blue and purple. Fast growing. 8".	\$0.25	STORMY DAWN (Sass '33) Another of the hybrid dwarfs, this one a blending of violet, red-brown, green and yellow. "The coloring of a storm cloud with the sun breaking thro'" 8".	\$2.00
LUTEA Lemon yellow, with narrow petals and horizontal F. 6".	\$0.25	TONY (Sass '31) Perhaps the best of the blackish red-purples. F. are velvety; the beard is orange. 8".	\$0.50
MANDARIN (Mil.'07) Broad S. of a good yellow; F. washed with purple. 6".	\$0.35	VELVO (Sass '33) Hybrid. This is a rich velvety dark violet. 6".	\$5.00
MAROCAINE (Mil.'14) Nice blue-purple self, making fine mass. 6".	\$0.35	YLO (Sturt.'26) Soft yellow with a bright beard. 10".	\$0.25
MISTRAL (Mil.'16) Very dark violet with velvety F. 10".	\$0.25		
NEOLA (Sass '32) S. deep violet; F. two shades of brown. A new color in dwarfs. 6".	\$0.25		
NUGGET A clear medium yellow. 10".	\$0.35		
ORANGE QUEEN (Barr '10) Deep rich yellow, of fine form and substance. 7".	\$0.25		
OWAISSA (Sass '34) Medium blue, of exceptionally clear tone. This was a great favorite last season. 6".	\$0.35		
PETITE AIME (Mil.'19) Greenish white and cream. 8".	\$0.25		
PHOEBUS (Mil.'12) A yellow, having both S. and F. violently flecked with purple. 6".	\$0.35		
PRAIRIE GEM. (Har.'05) Rich orange of a very pleasing tone. 6".	\$0.50		

We can furnish unnamed seedlings in various colors, that are very satisfactory for mass planting. Per dozen, \$1.50. Per 100, \$12.50.

Early Intermediate Irises

The joy of your May garden will be greatly enhanced, if you will paint a few of these irises into the picture. Their blooming time is between the dwarfs and the tall bearded irises; with us, the middle of May. As a class, they can be counted upon to increase rapidly and to show prolific bloom. The Re-bloomers, described in the next section, usually blossom at the same time as do these.

COSETTE (H.P.Sass '36) We have been needing a good white intermediate; we are hopeful that this will prove to be just the one. All Mr. Sass tells us of it is: "a white intermediate; stems about two feet, good branching." This is one of his usual terse descriptions, and we shall have to fill in details next season. 24". \$4.00

MR. KHAYYAM (Rich.'34) Unless we are mistaken, this is the first of the very dark blue selfs to be found among the intermediates. The flower is of medium size. 28". \$1.00

TA-WA (H.P.Sass '34) The blooms are pale yellow, of fine substance. We have not seen it, so cannot compare this new iris with the other yellow intermediates. 24". \$1.50

ABELARD (H.P.Sass '34) A brilliant mass in the early garden. The S. are a deep livid brown; the F. a bright purple. Certainly a different color among the intermediates. 26". \$1.50

ALICE HORSFALL (H.P.Sass '31) Alice is gowned in rich dark red, the petals showing black shadows in some lights, or a gleaming ruby red when the low sun shines thro' them. The beard is a heavy bronze-yellow. 30". \$0.50

AMBERA (H.P.Sass '30) The creamy yellow tones of this iris are made especially charming by the golden beard and venations. The large flower has fine form and substance. 30". H.M., A.I.S.'31 \$0.50

APRIL GOLD (Rich.'31) A golden yellow that has proved to be a prolific bloomer and a fast grower. 15". \$0.25

- CHALLENGER (J.Sass '30) This dark purple is blessed with a deepness of tone and with many large flowers on the stalk. 24". \$0.25
- COLLEEN (H.Sass '31) A reddish toned bicolor. \$0.25
- CRYSORO (Nich.'31) The deepest toned yellow of any of this class - almost an orange. The fine submittance helps make it a distinctly good iris. 24". H.M., A.I.S. '32. \$0.50
- CYRUS (H.Sass '31) A deep yellow, tho' without the orange of the last-mentioned. It is one of the tallest of this group. 36". \$0.25
- DOXA (H.P.Sass '28) Mighty interesting in its blending of buff, olive and blue. The many large flowers have fine substance. The colors are so subtle that they do not carry for landscape work. 20". H.M., A.I.S. '28. \$0.25
- ELIZABETH HUNTINGTON (Hunt.) A sport from Zua, all crinkled as is that iris. Elizabeth is a crisp blue. 18". \$1.00
- GAYNELLE (Rich.'31) We like the gaiety of this yellow. The tone is clear, the increase is rapid, and it sure does bloom! 30". \$0.35
- GENTIUS (H.P.Sass '34) The S. are a dark bluish-violet; the F. a royal purple. A color mass that everyone likes. 24". \$0.50
- GOLDEN BOW (H.P.Sass '35) This tall yellow has rather long blooms. It is a chrome yellow self. 30". \$1.50
- GOLDEN WEST (J.Sass '34) A yellow bicolor, the S. being Empire yellow, and the F. wax yellow. The beard is bright orange. 30". \$1.50
- KOCHINETTE (Kirk.'34) Deepest purple in color, like its parent, Kochi. But this iris has flaring falls and, perhaps, better substance. \$0.65
- LURIDA (Collected) A fascinating little mahogany-brown self, with velvety falls. 10". \$0.20
- MAYGOLD (Nich.'31) A canary-yellow self with nice form and excellent substance. 27". \$0.25
- RED ORCHID (J.Sass '34) The reddest of the intermediates. The color is carmine-violet; the velvety falls appear deeper. 28". \$0.50
- SUSA (H.P.Sass '34) Dark reddish purple, exceedingly rich in tone and with velvety falls. \$0.50
- ZUA (Crow.'14) Crinkled crepe paper, pale lavender-white in tone. Nothing like it! 16". \$0.25
- ZWANNEBURG (Den.'12) A blend of old gold, fawn and olive. Not showy, but different. 12". \$0.25

Fall Blooming Irises or Re-bloomers

This comparatively new class of irises is meeting with well-deserved favor in the warmer states, and is well worth a trial in more northern localities. As a rule, these irises bloom with the intermediates, and are the medium height that we find among those varieties. Your garden picture may have a surprising bit of color some October day, if you will plant a few of these Re-bloomers in a sheltered location, where they may develop their blossom buds early enough to decide to start all over again in the fall.

SANGREAL (J.Sass '35) We wonder whether, in originating and naming this iris, Mr. Sass felt that he had reached the end of his quest! It is evidently one of the finest of the yellow intermediates-rebloomers that has appeared, and we are eagerly looking forward to seeing it in bloom this year. The flower is of two shades of yellow, with chrome yellow markings on the haft and with a deep orange beard. Such is the paucity of detail that greets us! 28". \$5.00

SOUND MONEY (J.Sass '35) Mr. Sass expresses in a delightful way, his belief in the gold standard! A dwarf re-bloomer, of deep rich yellow that has the sheen of freshly minted gold - you don't see it often, now-a-days! The flowers are well shaped with cupped S. and flaring F.; the beard is orange; the blooming period is exceptionally long. 10". \$0.50

- AUTUMN DAWN (Nies '34) If one must be up at dawn, it is delightful to be greeted with such a joyous color! The iris is a blend of old gold and pink, and is a vigorous grower. We are told that in California, where it originated, this is an almost continual bloomer. But it failed to do that here. 28". \$2.50
- AUTUMN ELF (Brown '33) We learned long ago, that elves were amazing midgets, and now we find it still true, about this iris. We know it blooms in the spring; we have seen fine blossom stalks in July and August; we are assured that there are plenty more later in the fall. The creamy S. are slightly ruffled; the lavender F. have a cream edge. The bloom is not large, but these possibilities of iris that will give us continual bloom are most interesting. \$3.00
- AUTUMN HAZE (H.P.Sass '34) The finest of the deep violet irises of this division. The flowers are very large, and the stems unusually low branched. 30". \$10.00
- DORCAS HUTCHESON (Sass-McDade '33) A fragrant dark violet self of fine form and fair substance. 18". \$0.50
- ELEANOR ROOSEVELT (Sass-McDade '33) Another deep violet self, almost black in fact. This excels in rapid growth, and in being one of the most certain to bloom the second time in the autumn. 26". \$0.75
- FRANKLIN ROOSEVELT (Sass-McDade '33) This iris is a rich red-purple, with a deep blue center on the falls. Increase is slow. 30". \$7.50

FROST QUEEN (Sass-Hill '33) The Queen is gowned in white with a delicate hint of blue at the waist. 22". \$2.00

GOLDEN HARVEST (J.Sass '30) The olive-yellow S. have a bluish sheen near the claw; the F. are citron yellow. Growth is rather slow. 18". \$1.00

JANE KREY (Mind.'30) Dark violet, much like the old Crimson King, but taller. 30". \$0.25

MARTIE EVEREST (Kirk.-McDade '33) A tall, medium blue of fine form. 36". \$10.00

OLIVE WHITE (Sass-Hill '33) Deep cream with green venations. The flower has fine form. 18" \$0.50

SEPTEMBER SKIES (Sass-Hill '33) Very fine rich purple. Growth is rapid. 16". \$0.50

SOUTHLAND (H.P.Sass '34) One of the finest of this group. Deep yellow in color, the S. are domed, the F. flaring; and the substance is heavy. 24". \$7.50

ULTRA (H.P.Sass '30) A little gem. The S. are a distinct blue; the F. are flushed deeper. 14". \$0.25

Siberian Irises

"To see them is to love them" and to decide that one must have a few of these irises for the perfect garden picture. So dainty are the flowers in colorings of purple and white and many shades of blue; so graceful are the clumps of narrow foliage; so cheery are the plants in whatever location you wish to place them; so acceptable are the blooms for table decoration, that we like to use them at the pool-edge, in the border, and in shady corners. Plant them deep, feed them liberally and water them copiously. Planting may be done either in the spring or after the blooming period, being sure to keep them well watered.

BLUE CHARM (Sass '27) Charming in tone, charming in form, charming in mass production in the garden, this iris is a light blue with large S. and round horizontal F. 38". \$0.50

BLUE HERON (Cleve.'27) This is the earliest bird among the blues, stepping in on his long slender legs soon after the middle of May. A medium blue in tone. 36". \$0.35

BLUE RIDGE (Cleve.'29) The loveliest and best of the late silvery blues. The F. are horizontal; and both the S. and style arms have turquoise midribs. 34". \$0.35

BOB WHITE (Cleve.'27) Appears to be a shy bird in New England. A pure white iris with no venations. Rather slow in growth. 36". \$0.50

CAESAR (Morg.'25) The crowd hails Caesar, as he stands tall and fine in his toga of dark blue, as the best of the low-priced dark purples. The petals are broad and straight hanging. 48". \$0.50

CAESAR'S BROTHER (Morg.'32) The Brother came after Caesar and surpassed him in richness of color and in perfection of form. The iris is such a dark violet as to be almost black; it blossoms late and is tall. 48". \$2.50

CHAUDIER (Pres.-Kell.'32) A free-blooming and fast-growing medium blue, whose large flowers have good carrying quality. It makes a beautiful tall mass of light blue effect. 42". \$0.65

GATINEAU (Pres.-Kell.'32) Topnotcher! We give this the highest praise of any Siberian iris. The blossoms, of which there are many to the stem, are the largest and the finest in form and substance, and are of a remarkably clear blue tone. If we could have but one Siberian, Gatineau would be our choice. 40". H.M., A.I.S. '33. \$2.00

HEAVENLY BLUE (Wat.) This iris was so certain that its color matched that of the sky, that it stretched up and up, trying to get near enough to make a closer comparison. The intense blue has some turquoise and white trimming. Early 48". \$0.50

KOOTENAY (Pres.-Kell.'32) We'll root for Kootenay, whose light ground has a deeper shade of blue so delicately washed onto the petals, that it gives a very charming effect. 36". \$0.50

LLEWELLYN (Cleve.'29) This soft colored blue Siberian with its soft syllabled Welsh name, is dear to the hearts of iris lovers. The large broad petals show no white, but do have an electric-blue flush that makes the iris very distinct in tone 50". \$1.00

MADAWASKA (Pres.-Kell.'32) A deep yet bright dark blue. The white patch on the petals makes it different from Caesar; also, it is not as tall. The growth is very rapid. 38". \$0.65

MATTAWIN (Pres.-Kell.'32) Several shades of blue mingle to make this a very charming iris. The F. are a violet blue, much like Periwinkle; the S. are dark and the style arms are turquoise. \$0.75

MILDRED STAHLMAN (Wash.'31) Pale porcelain blue with enough turquoise to make the flower very lovely. A late bloomer. 30". \$1.00

MISS DULUTH (Sass '32) The only girl who comes to the Siberian party in a velvet gown. It is a dull dark violet, rich and of heavy substance. 30". \$0.50

MORNING MAGIC (Cleve.'31) This pink-hued lavender Siberian lends magic to the morning picture of the garden. One of the loveliest of all, with many blossoms to the stalk. Early. \$2.00

MOUNTAIN POOL (Cleve.'31) As cool and refreshing as the bluest waters of a mountain pool, these low-growing flowers almost cup their petals in an attempt to hold the reflection of the sky. A clear sky blue, with no white. 24". \$1.00

NIPOGON (Pres.-Kell.'32) A medium blue, whose straight-hanging falls are flushed with purple. 38". \$0.35

OPAL BLUE (Sturt.'33) The blue of an opal, translated into an iris. A mass of sky blue for the garden, that has an immediate appeal. \$1.00

OTTAWA (Morg.'28) This is another of Mr. Morgan's fine dark Siberians. The flowers are a violet-purple, more brilliant than Caesar and his Brother, and further differentiated by a conspicuous white border around the falls. \$4.00

PERIWINKLE (Cleve.'27) A bright violet-blue, with some white at the center. The S. are very tall for this group and are flushed with purple; the F. have a turquoise midrib, are horizontal and finely finished. This iris is one of our favorites. 40". \$0.50

RED EMPEROR (Sturt.'18) Absolutely distinct! No other Siberian so nearly approaches red. In reality, the wide petals are a wine-red, with just a touch of blue. 32". \$1.00

RIDEAU (Pres.-Kell.'32) A light blue, the horizontal falls having a narrow darker flush along the center. The style arms are silvery. 36". \$0.50

ROYAL FLUSH (Cleve.'29) A deep purple with a flush of red. Not as red as Red Emperor, but much taller. 52". \$2.50

SILVERTIP (Cleve.'29) A tip to Siberian buyers - buy Silvertip! A fascinating light blue, with silvery center, that makes an entrancing garden picture when planted with light pink bearded irises. This, too, is one of our favorites. 40". \$1.00

SNOW CREST (Gage '32) This rides the crest of the wave of popularity for the white Siberians. A white flower that is pure and sparkling, with slightly frilled edges. It is large in size, and is sure to bloom and increase rapidly. This is by far the loveliest that we have seen. 38". \$2.00

SPECIAL #1

Only 5 of these collections for sale.

The three best Siberian irises, Caesar's Brother, Gatineau and Snow Crest, value \$6.50, for \$5.00

SPECIAL #2

20 all different, and labelled. \$3.00

Will include Blue Ridge, Chaudier, Madawaska, Mattawin, Nipogon, Rideau and 14 of the 25¢ varieties, our selection, value \$5.50. All for \$3.00

SUMMER SKY (Cleve.) Different from all other Siberians. The blossoms are a pale blue and white, very delicate and very free-flowering. This is very new, and has not been previously offered, as far as we know. \$3.50

TURQUOISE CUP (Cleve.'27) The flower is really a delightful soft sky-blue, but the large turquoise stigmas so dominate the effect, that we drink joyfully from this Turquoise Cup. 36". \$0.75

WHITE DOVE (Cleve.'27) This Dove is so tall, that we are sure it must have borrowed its legs from another bird! The tallest of the whites; the falls droop. 60". \$0.50

WHITEHILL (Berry '31) The only Siberian we have, that originated in California. Dr. Berry says that it exists during hot dry summers, better than do most of the others. 32". \$1.50

WHITE WAY (Way.'35) These large snow-white flowers have a heavy wavy substance. We shall be interested to compare it with Snow Crest. 38". \$2.00

ZEST (Sturt.'34) Distinct in that the bright medium blue flowers have unusually red style arms, so that the effect is quite brilliant. 30". \$1.00

The following are 25¢ each; 3 of one variety, 50¢.
Your selection of any 6, \$1.00.

BALCIAE. White, lavender flushed.
BLUE OWL. A large dark blue, with a white center.
BLUE WINGS. Light blue, with very broad petals..
BUTTERFLY. Almost sky-blue.
DRAGONFLY. A tall medium blue.
DUCHESS OF YORK. Deep violet and dark blue.
EMPEROR. Tall dark violet.
FLORRIE RIDDLER. An early medium blue.
KINGFISHER. Rich violet with a white center. Tall.
KINGFISHER BLUE. A mighty lovely tall light blue.
LADY NORTHCLIFFE. Rich violet with white center.
MRS. GRAY HILL. A medium blue with white.
MRS. PERRY. Pale lavender.
MRS. ROWE. White, flushed with pink-lavender.
MRS. SANDERS. Bright violet and blue.
MYBLUE. Very rich dark blue.
NORA DISTIN. Violet, shading lighter at the edges.
NURSE CAVELL. Violet, veined with white.
PAPILLON. Light blue of medium height.
PEGGY PERRY. A blue-violet.
PERRY'S BLUE. A tall light blue.
PETER PAN. White, heavily veined with blue.
PIGMY. A low dark violet.
RED RAIDER. Dark red-purple.
SKYLARK. Exquisite light blue, edged with white.
SKYROCKET. An early tall rich violet.
SNOW QUEEN. A low-growing white.
SUNNYBROOK. Medium blue, also low growing.
THELMA. Alice blue with white.
TRUE BLUE. Almost a real blue.

Japanese Irises

These are the big three-or six-petalled irises that stretch the iris blooming time into July. When happily established, there is nothing to compare with them for sheer grace and beauty. They will grow in the full sun, but are happier, and retain their colors better, if they can have partial shade during a part of the day. They like a heavily manured soil, top-dressed with peatmoss or more manure; and if one wishes to see the blossoms at their best, lots of water should be given while they are in bud and flower. Plant them deep, having at least 2" of soil over the crown of the plants - i.e., where the roots and leaves join. These as well as the Siberians can be planted in the spring, summer, or fall. After moving keep them well watered.

AGNES REED (Chi.'26) sgl. Huge dark mulberry purple blooms, with a halo of royal purple.	\$0.75	HO-O-JO (Dreer '28) db. Gorgeous rose color with a velvety texture. Large.	\$2.00

TEMPLE FLOWER (Chi.'28) sgl. Bluish violet with			

Iris Species

("R.G." after a name indicates suitability for Rock Gardens.)

A. H. NICHOLLS (Nich.'34) Clear white with a yellow crest. A new form of I. carolina, collected in Carolina. 24".	\$2.00	ers have a green-gage fragrance and are partially hidden in the leaves. Exceptionally good and easy to grow. 8".	\$0.50
I. arenaria. R.G. A dainty little yellow iris, like a fairy bearded iris. Needs a dry location with sandy soil May. 4".	\$0.50	I. guldenstaedtiana. We have both a light blue and a pale yellow form of this iris. 18". Persia.	\$1.00
AUTAUGA (Nich.'32) A bright rose-pink form of I. carolina. 30".	\$1.00	I. hexagona. A tall blue.	\$0.75
BELLORIO (Mohr.'24) Mouse-gray, with some purple. Needs a dry location.	\$0.50	I. hyacinthiana. Dainty and charming in its colors of soft blue and yellow. 12". China. Can't help but like it, early and grows well.	\$0.75
CANTON (Nich.'35) R.G. Gray lilac with some yellow and purple. A seedling of I. foresti. 12".	\$1.00	I. kaempferi. Rich dark purple. The original from which the Japanese irises have been developed. Likes moisture, grows fast and does well. 32".	\$0.50
I. chrysophoenicea. One of the sure-to-grow Delta irises. The color is purple with gold. 36"	\$0.75	I. kermisinia. Another moisture-loving iris in claret-red. We have very interesting seedlings of this in many different colors. Most outstanding, nothing like it, grows well.	\$0.75
CLARETTE. A soft red self, whose six petals open flat. 28".	\$1.50	MORERA. Mulberry toned. Should have a dry location. 14".	\$0.75
I. cristata. R.G. A tiny little sky-blue crested iris, that likes acid soil and partial shade. 4"	\$0.25	I. prismatica. White with violet. A very dainty flower, that likes some moisture. Most graceful of all irises. 12".	\$0.50
I. cristata alba. R.G. the white form of the above, that is adorable. 4".	\$0.50	I. pseudacorus. The "Yellow Flag". Blooms with the late Siberians and will grow anywhere, even in the water. 30".	\$0.25
I. cuprea. An entrancing reddish copper, the petals having a very metallic sheen. A form of I. fulva. 18".	\$0.75	I. pseud. fl. pl. A very double form.	\$1.50
DAIRYMAID. R.G. The white form of I. virginica. This is a very dainty and charming little round-petalled flower. 12".	\$1.50	I. pseud. albus. The white form, that is very interesting, and a strong grower.	\$1.00
I. dichotoma. (Vesper Iris) A mass of pink-lavender flowers, opening at mid-afternoon and closing at dusk. Blooms in August. 48".	\$0.50	I. pseud. bastardi. A smaller, daintier yellow.	\$1.00
DOROTHEA K. WILLIAMSON. A velvety red-purple of easy culture. 18".	\$0.35	I. ruthenica. R.G. White, veined with dark blue.	\$2.00
DOROTHEA ROSE. A rose-pink seedling of the above, exceedingly velvety and lovely. 18".	\$1.25	I. setosa canadensis. R.G. A lilac-toned iris that grows wild from Siberia to Maine; cute. 6".	\$0.50
I. ensata. R.G. A free-blooming soft lavender, that likes a dry location. 10". Asia.	\$0.75	I. Shrevei. A sturdy growing lavender-blue. 36".	\$0.50
I. foliosa. R.G. A brilliant blue with a sprawling flower stalk. 6".	\$0.50	I. Shrevei Special. White, with lavender button-holing. 36".	\$0.75
I. fulva. Burnished copper. One of the Delta irises. This seems to like some moisture. 18".	\$0.75	STELLA MAIN. R.G. A dainty white, delicately veined with lavender. A form of I. versicolor. 10"	\$1.50
I. gracilipes. R.G. A fragile lovely little iris from Japan. 5".	\$0.75	I. stylosa. The blue winter-blooming iris of warm countries.	\$0.75
I. graminea. R.G. Reddish purple and blue. The flow-		I. tectorum. R.G. Large deep lavender-blue with an ivory crest. The "Roof-Garden Iris" of Japan. Very attractive flower and a good doer. 10"	\$0.50
		I. versicolor. Our native swamp iris. Blue. 16".	\$0.25
		I. virginica. Light lavender blue. 24".	\$0.25

SPECIAL

12 Iris Species, value \$5.35 for \$2.50

I. arenaria, chrysophoenicea, cristata, dichotoma, D.K. Williamson, hyacinthiana, kaempferi, kermisinia (seedling), prismatica, pseudacorus, tectorum, virginica. Please add 15¢ for postage.

Spuria Irises

These tall narrow-petalled irises come into bloom with the last of the bearded section, and continue until the Japanese begin. The foliage is stiff and lancelike. They make good tall accents in the border or at the pool edge.

A.J.BALFOUR. Cambridge blue. 48".	\$1.00	LORD WOLSELEY. Bluish purple. 36".	\$0.75
ALICE EASTWOOD. Ivory white; the finest.50".	\$3.00	MONAUREA. Golden yellow.	\$1.00
DOROTHY FOSTER. A violet self, except for the pale cream that surrounds the yellow midrib.32"	\$1.50	MRS.A.W.Tait. Light porcelain blue.	\$0.50
EUPHROSYNE. Blue, slightly touched with lilac. The S. are extra long; the styles are reddish.36".	\$2.00	NELLIE STUART. A medium blue that carries well.	\$5.00
FAIRY WAND. Old gold delicately etched with blue. Very lovely and distinct.	\$4.00	NOTHA. Rather deep blue with light styles.	\$0.50
GOLDEN NUGGET. A large flowered soft yellow.	\$4.00	OCHROLEUCA. Ivory white with yellow patch.	\$0.50
HAZY HILLS. Charming light blue, tinted with old gold.	\$3.00	QUEEN VICTORIA. Deep ivory with orange yellow. 42".	\$1.25
JUNO. Much like Dorothy Foster, but different in shape.	\$1.50	SHELFORD GIANT. Large white and gold. 42".	\$1.50
		SIR MICHAEL FOSTER. Very dark violet.	\$1.50
		SULPHURIA. Ivory and yellow. 32".	\$0.75
		SUNNY DAY. Gleaming golden yellow. Very fine. We heartily recommend this iris. H.M,A.I.S. '34.	\$0.50

Regelia Irises and Their Relatives

Have something different in your garden from what your neighbor has! There is absolutely nothing else like these large dusky heavily veined flowers, of colors inconceivable until you see them. They bloom in the middle of May before the regular irises, and average 10" to 18" in height. They want the dryest spot in the garden; in fact, they love it if it dries out to dust where they are planted, and they do not want to be watered in the summer. Dear Gardiner - can you imagine anything nicer to have, if you are going away for a long vacation?

ARTEMIS. All dark.	\$2.00	There's no other iris that has its blue laid on so smoothly. 24".	\$1.00
DILKUSH. A rich violet and red-purple	\$0.75	IB-PALL. Reddish lilac.	\$0.50
DORAK. Clear light violet and purple..	\$1.00	KOROLKOWI Hybrids. Various tones of brown.	\$0.50
FLORA. S. are reddish; F. light grey, heavily veined with maroon. Long maroon patch.	\$1.00	NAZARIN. Purple, veined darker.	\$0.50
HEBE. Gray ground almost covered with purple.	\$1.00	PARVAR. Velvety black-violet.	\$1.00
HECATE. Smoky cream and mahogany.	\$1.50	SATURNUS. Gray, heavily veined with purple.	\$0.75
HERA. Brownish red and purple.	\$1.00	SHIRAZ. Reddish violet.	\$1.00
HESPERIA. S.pinkish;F.fawn, veined mahogany.	\$1.50	STOLONIFERA. Bronze, shot with electric-blue.	\$0.75
HOOGIANA. The loveliest of this class. The petals are an entrancing blue, with a silky texture.		VAGA. Much like the above, but with less venation.	\$1.00

SPECIAL

3 of the above, Hoogiana and 2 others, in distinct colors, - \$1.25

Bulbous Irises

Dutch Irises. These irises are best known through the florists' windows, but are very satisfactory when planted outside. We find that the bulbs sometimes deteriorate after two years, but they are inexpensive enough, so that one can treat them as biennials. Plant them in the fall, about 4" deep, and give them a generous mulch of peat-moss. We can furnish them in assorted colors: - white, yellow and various shades of blue. 12". dozen- \$0.50

I.bucharica. R.G. Like a miniature corn stalk, with highly varnished leaves. The attractive cream and yellow blossoms appear in each leaf

axis. Altho'a native of Bokhara, this iris is hardy in the north, and will prove an interesting addition to the garden, as it is absolutely distinct from any other iris. It flowers in April. Plant the bulbs about 4" deep and give a generous mulch. 12". Fall delivery. Each \$1.00

I.reticulata. R.G. The earliest iris to bloom, coming with the crocuses. The color is a fine rich amethyst, with a dash of yellow on each petal; very charming. You will never want to be without it after you once see it. Plant in the fall, 4" deep, and give them the same heavy mulch. 4". Per dozen \$1.50

A BLOOMING AND PLANTING TABLE

	Bloom	Plant
Bulbous Irises	April & June	Late fall
Species	May & June	Spring to fall
Dwarfs	Late April & May	Any time
Intermediates	Middle of May	Summer & fall
